*School-assessed Coursework for Unit 4 will contribute 25 per cent to the study score*

What are Units 3 and 4 HHD all about?

As part of HHD in Units 3 and 4 you will study a range of concepts and ideas about the health and development of individuals in Australia and across the world.

In Unit 3, you will study the health of Australia - including population groups in Australia, major diseases, nutrition and the Australian healthcare system.

In Unit 4, you will study health on a global scale - including the differences between developed (rich) and developing (poor) countries, organisations that aid development and specific development programs.

To be judged satisfactory for this subject you will need to:

- Attend class regularly
- Pass all SACs
- Complete required coursework in all outcomes
- Engage and participate in class
- View and respond to a range of clips and articles
- Complete activities and handouts
1. Classify each of the following examples as a physical, social, emotional, mental or spiritual dimension of health and wellbeing.
   a. A sense of belonging to a community group
   b. Having an asthma attack
   c. Positive thought patterns
   d. Recognising the difference between embarrassment and anxiety
   e. Experiencing productive relationships with school mates
   f. Having adequate levels of energy
   g. Experiencing positive self-esteem
   h. Having effective communication with others
   i. Experiencing sadness at appropriate times
   j. Establishing and acting according to values and beliefs

2. Brainstorm the range of factors that you feel influence your own level of health and wellbeing. Remember that health and wellbeing is not just physical.
Michelle’s story

Michelle is a 26-year-old lawyer who works in a large corporation in the city. She has many responsibilities and generally copes with these very well. Recently, she was given a large contract to work on. The demands of the contract are substantial, and her work life has begun to dominate her free time as well as her working hours. Michelle has been feeling more stressed at work. Despite this, she has felt good about herself for being trusted to work on this contract.

Michelle has found that she has had to cut back on her social activities and other things she enjoys, such as being a part of the local netball club and spending time with her family. Missing such interactions has made her feel disconnected and sad at times, but she has been able to manage these emotions. She has also reduced the amount of time spent at the gym and preparing healthy meals, which has caused her to gain some weight.

3. Identify one example from Michelle’s story that relates to each dimension of health and wellbeing. Use evidence to support your response.
4. Write a short case study (a detailed paragraph) on the health of a friend or family member.
   - Focus on describing the dimensions of health, particularly their physical, mental and social health levels.
   - Use the case study on above as a guide.
